Haydara Ghassan Ahmad

Front End Developer | React & Next.js Developer | Business-Centric Application Analyst

Email: haydaraah12@gmail.com | Phone: +971 523 096 554 | LinkedIn: Haydara Ahmad

---

Professional Summary

Front-End Developer with 4 years of experience building scalable React and Next.js applications for government and enterprise clients. Strong expertise in modern JavaScript (ES6+) with deep understanding of component-driven architecture, performance optimization, and maintainable code. Specialized in bilingual (Arabic/English) platforms, dynamic form engines, and workflow-driven applications. Committed to delivering exceptional user experiences by transforming complex requirements into intuitive, fast, and reliable interfaces. Strong business awareness, actively contributing to requirement discussions and ensuring frontend solutions align with project goals and user needs. Known for rapid learning and the ability to quickly adopt new tools and technologies that support project delivery.

Technical Skills

Programming Languages:

- JavaScript, TypeScript, Python, HTML5, CSS3, Java

Front-End Frameworks & Libraries:

- React.js, Next.js (App Router, SSR, ISR)
- TypeScript
- Redux, Context API, Zustand
- zod
- Form.io (Custom Component Development, Dynamic Forms)
- Tailwind CSS, Bootstrap
- Material UI (MUI), shadcn/ui
- next-intl, i18n (Bilingual Applications – Arabic/English)
- Email Templates (Responsive HTML/CSS, Cross-Client Compatibility)

Back-End & API Development:

- RESTful APIs, WebSocket APIs
- tRPC
- API Integration with NestJS & Spring Boot
- Backend templating with Thymeleaf (Spring Boot)

Workflow & Business Logic:

- BPMN (Business Process Modeling & Workflow Design)
- Business Requirements Analysis
- Workflow-driven Web Applications

Databases:

- PostgreSQL, MySQL, SQL Server
- Database Tools: DBeaver, SQL Server Management Studio (SSMS)

Tools & Platforms:

- Git (GitHub/GitLab)
- Postman
- CI/CD Pipelines
- Docker

Professional Experience

Infostrategic (Virtual Trust) – Abu Dhabi
Front-End Developer | React & Next.js
Jan 2023 – Present

- Developed and maintained scalable React.js and Next.js applications for government and enterprise projects, improving page load performance by up to 35% through optimized rendering, SSR/ISR strategies, and code splitting.
- Led the implementation of fully bilingual (Arabic/English) platforms, ensuring 100% internationalization coverage and proper RTL/LTR handling across complex workflow-driven applications.
- Adopted a Low-Code Platform (LCP) approach using Form.io to build dynamic, configurable form engines, reducing repetitive frontend code by nearly 40% and accelerating application setup time.
- Developed and customized advanced Form.io components and libraries to support complex approval flows, conditional rendering, and backend-driven form configurations.
- Optimized dynamic rendering and state management (Redux, Context API), improving maintainability and reducing frontend bug reports during integration cycles.
- Collaborated closely with backend teams (NestJS, Spring Boot) to integrate RESTful and WebSocket APIs, align UI flows with API contracts, and minimize integration issues.
- Worked across multiple frontend stacks, including React with Material UI and Next.js with Bootstrap and shadcn/ui, selecting the best tools per project needs.
- Reduced frontend integration bugs by 20–30% through defensive programming and improved API contract alignment.
- Built reusable UI component libraries that reduced development time for new modules by 25%.
- Improved Lighthouse performance scores from 70–80 to 90+ across multiple pages
- Worked closely with design teams using Figma, translating UI/UX designs into pixel-perfect, responsive frontend implementations while maintaining design consistency and component reusability.
- Contributed to business logic analysis by understanding service requirements, user journeys, and approval flows, ensuring accurate and user-friendly implementation.
- Participated in Agile development cycles, collaborating with designers, backend developers, and stakeholders to deliver features on time and to specification.
- Developed and maintained responsive email templates, ensuring cross-client compatibility and reusable designs for marketing and transactional communications.
- Supported deployment workflows and development pipelines using Git, Postman, CI/CD pipelines, and modern hosting platforms.
- Contributed to frontend architecture decisions to ensure long-term maintainability and scalability across projects.

Freelance Front-End Developer - Remote
2021 – 2023

- Built custom React & Next.js applications for small businesses and individual clients.
- Developed responsive landing pages and dashboards.
- Integrated REST APIs and third-party services.
- Managed full project lifecycle from requirement gathering to deployment.

- Ensured cross-browser compatibility, performance optimization, and SEO best practices

---

Education

- Bachelor’s Degree in Mechatronics Engineering – Al Manara University, 2022

Languages

- Arabic: Native
- English: Very Good (Professional Proficiency)
